

THE FUTURE OF CUSTOM
PROCEDURE PACKS
FROM THE BRAND YOU TRUST

The Future of Custom Procedure Packs from the Name You Trust

For over 30 years HALYARD has been providing high quality surgical drapes and gowns, designed to deliver protection, comfort and optimal patient outcomes.

Leveraging HALYARD'S global expertise in supply chain, component sourcing, utilisation reviews and cost efficiencies, we are now extending our offering to provide ANZ clinicians with HALYARD branded Custom Procedure Packs (CPPs). You can now get the HALYARD products you know and trust directly in a HALYARD CPP.

Based on years of working together with clinicians globally we know that some of the challenges you face in Operating Theatres include:

- Operational inefficiencies
- Lack of visibility to costs and inventories
- Suboptimal utilisation of Operating Theatre supplies
- Procedural supply waste
- Need for improved throughput
- Staff satisfaction & retention

That's where HALYARD comes in. When you make the decision to switch to HALYARD CPPs, our clinical experts work with you to ensure EVERY component is used EVERY time. It's part of our PACT pledge and the HALYARD CPP Solution.

THE HALYARD CPP SOLUTION

UTILISATION EFFICIENCY

Get clarity with customised data analysis. With CPPs being one of the highest costs for Operating Theatres, HALYARD collects data and reports information so you can make more informed decisions about your CPP usage.

HALYARD COLOUR CODING AND SPECIALTY GRAPHICS SYSTEM

Colour coding and the specialty graphics system for both HALYARD shipping cases and pack inserts provides fast and easy identification of the clinical specialty of your pack to reduce operational inefficiencies.

PACK CONFIGURATION TOOL

HALYARD'S configuration tool will assist you in creating a final recipe list of components featuring images and descriptions. The tool enables you to share the final pack recipe, to gain approval within your facility.

HALYARD PACT Program*

The innovative Custom Procedure Pack (CPP) Program Designed To Achieve Your Clinical And Financial Goals Long Term

When it comes to CPPs, you should feel confident that your supplier has your best interest in mind. That's why the HALYARD PACT PROGRAM* is based on:

QUALITY

Market leading HALYARD branded drapes and gowns in your CPP, backed by extensive efficacy and performance testing.

EXPERT CLINICAL CONSULTANTS

HALYARD'S Perioperative Consultants are dedicated CPP specialists with clinical expertise and extensive understanding of the Operating Theatre. They will partner with you to optimise your CPPs to ensure you'll receive the best value, without compromising on quality.

PACT PLEDGE

As your CPP provider, we pledge to be your reliable partner for the long term. It's a pact we take very seriously- and we look forward to partnering with you.

ALIGNMENT WITH YOUR GOALS

Our Operating Theatre experts and perioperative consultants are measured on how well they achieve your goals, not on increasing our own profits.

PACK OPTIMISATION

HALYARD'S Perioperative Consultants work with your team to ensure EVERY component is used EVERY time, so there is no wastage both from an environmental and financial perspective. We offer regular utilisation reviews of your current packs to enhance component usage, improve product sequencing, incorporate requested items and evaluate packaging options.

BENEFITS OF USING CUSTOM PROCEDURE PACKS

ACHIEVE COST SAVINGS / CONTROL

- Based on a study reported by The Clinical Services Journal, Pre-CPP, the average time taken to open set-up packaging for a hip replacement procedure was 9.3 minutes. Post-CPP, the average time was 40 seconds, enabling staff to work more efficiently and deliver more procedures in less time.
- Tracking the cost of single use items during a procedure allows the clinical management team to measure the cost per procedure for accounting purposes.
- Procedure Packs enable healthcare providers to reduce the amount of stock hospitals need to carry at any one time and reduce the risk of expiry of slower moving lines.
- Using packs also enables managers to more easily identify total procedure cost.
- Procedure Packs ease the administrative burden and reduce management costs by cutting down the amount of time needed to be spent on monitoring and ordering inventory.

REDUCING WASTE

Packs replace the need for individually wrapped components and will significantly reduce non-clinical/clean waste. For large surgical operations, procedure packs can significantly reduce the amount of discarded packaging, such that the number of clinical waste bags required is more than halved.¹

CARING FOR YOUR PATIENTS

- CPPs improve aseptic control by reducing potential touch contamination which can leave patients less exposed to infection and so improve clinical patient outcomes.
- CPPs lead to a standardisation of practices and drive up quality throughout the hospital/hospital group which will lead to improved quality of clinical practice and staff training.
- Simplify batch traceability.
